

## WE ARE FINALISTS IN THE 2019 AESTHETIC AWARDS!

The Byonik team are delighted to announce that we are FINALISTS in the category for ENERGY DEVICE OF THE YEAR in the Aesthetics Awards 2019.

We are grateful for your continued support and hope that you can take a moment to VOTE for us now by clicking below!

## PROUD TO ANNOUNCE OUR FIRST BYONIK CLINIC IN CAMBRIDGESHIRE

**ClockHouseDentistry**  
LINTON 

"We chose the Byonik Pulse Triggered Laser after much careful consideration of other non-invasive skin rejuvenation systems on the market. Nothing else compares to the Byonik with its compact appearance, which takes up minimal space in our surgery and can be set up, and ready to use, within just a couple of minutes. This unique treatment has very few contraindications with no known side effects and absolutely NO downtime, which our discerning clients are very keen to experience.

The protocol allows for safe, all year-round treatment that can be used on all skin types due to the system being a low level light laser with no thermal action. Our clients are already seeing fantastic results and being able to offer salon quality retail products for them to use at home in between clinic visits further maximises the rejuvenating effects of the Byonik. We are very proud to be the first clinic in Cambridgeshire to be able to offer this fantastic system and client uptake has surpassed our expectations."

Rehydrate with a Byonik Facial

Winter is notorious for dry, harsh conditions for the skin. The contrast with central heating can lead to skin feeling dry, stripped and lacking 'chutzpah.' Winter is a great time to add a facial into your skincare routine and even just one in the lead up to the really cold months mean you'll reap the benefits the whole season.

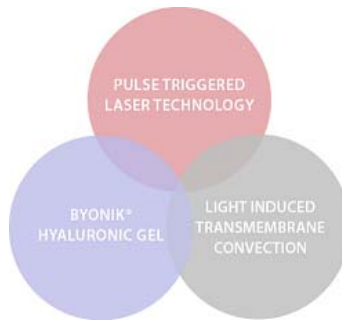

The Byonik facial is the perfect antidote for parched skin. Using technology derived from NASA research, red and near-infrared lasers are used to penetrate the skin's cells, bringing energy to increase the cell's turnover. This enables hydrating hyaluronic acid gel to travel down into the cells and provide deep moisture, rather than just sitting on the skin's surface. The laser is triggered by your own pulse rate, which research shows this is the only way to reach deeper layers of the skin. Painless and ultra relaxing, the facial will give glowing results immediately. We visited the Cosmesurge clinic on Harley Street to try the facial out. The verdict? An unbeatable glowing complexion.

From £220 per session  
Available in various clinics around London. (Not yet available at Cosmesurge for public bookings.)
